

# TheForwards™ NOW AVAILABLE

**LIC has been providing genetics to Irish farmers for thirty years and there's no doubt these genetics have helped to produce some of the finest cows in the country.**

Founded in 2017, we're building on what we've achieved to date with the new 2020 graduate bulls.

To find these bulls, the process involves LIC experts examining the dam's cow family and the bulls' pedigree including physical attributes, aimed at increasing the accuracy of delivering genetics that will improve your herd. LIC's genomic evaluation model is also used to provide an estimate of a bull's genetic quality at a young age. This results in the young bull having both a gBW and gEBI.

IBB is proud to present the 2020 graduates. These bulls are bred from high genetic value NZ sires.

## A taste of the 2020 bulls.

**LIC Brooklawn ML Eclipse** is a Glen Koru Epic son (JE4509) out of a Moodys Executive (YMD) cow coming from Cathal Lowry's herd in Galway. The F9J7 dam's five-year production average is 660kgms. Fertility is proven, at 364 days CI to date. Eclipse is 275 gEBI and 276 gBW.

**LIC Moorehill Max** with 349 gBW and 252 gEBI, sired by the well-known Carsons FM Cairo (FR4507), impressive on fertility at 4.8 gBV (the dam's six-year CI average is 371 days).

**LIC Kilvoige Aaron** is a G-Force (JE4558) son with good fertility indexes. His dam is doing milk solids in excess of her liveweight in her first lactation. Aaron is 310 gBW and 269 gEBI.
